Innovative Solutions for Construction Estimating

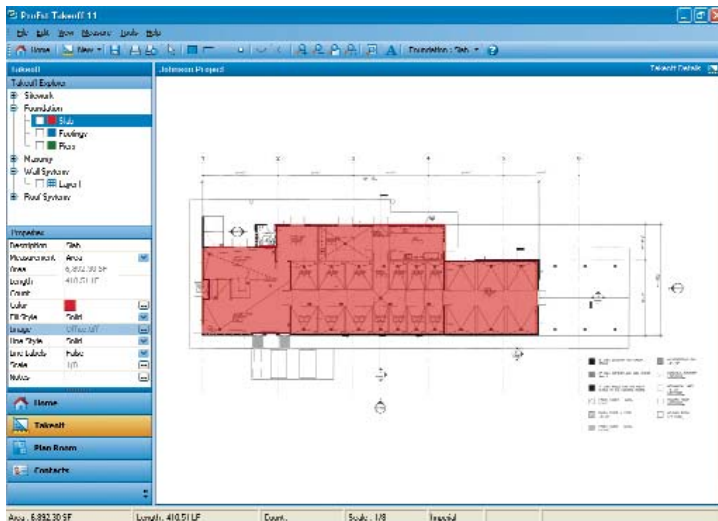

ProEst 11[®]

TAKEOFF

Innovative in its simplicity – ProEst[®] Takeoff 11 delivers the power to takeoff nearly any project, any size, easily and accurately.

Standard of Excellence

In today's highly competitive market, the success of your construction company relies heavily on the ability to generate quick and accurate estimates.

By using seamless integration with other applications to increase speed and efficiency, ProEst Takeoff has set a new standard in construction estimating software. Its familiar, easy-to-use interface, and its logical layout and design make it obvious to see why ProEst Takeoff is unsurpassed in the industry. A proven track record with thousands of clients worldwide ensures that your investment will be paid back many times over the years to come.

Simple Blueprint Takeoffs

The ProEst Takeoff software now gives you a way to quickly and accurately measure lengths, areas and counts. This information can be taken off utilizing both traditional paper plans and a digitizer or digital plans and a mouse – right on the screen. The system allows you to color-code the takeoff image in order to label various materials and the takeoff

- > All Dimensions are On-Screen
- > Imperial and Metric Systems

ProEst 11 TAKEOFF

quantities are always displayed for quick reference. You can also organize your jobs by status or by type of job for quick access, then print the colored takeoff sheets and layers for use in the field.

Integrate Easily

ProEst Takeoff now integrates with both our ProEst estimating software and Microsoft Office. This means you can easily transfer your valuable estimate data into Excel and Outlook, saving precious time by eliminating repetitive work throughout the job cycle. There is also direct integration with many online Plan Rooms. Automatically pull in updated project information including specifications, plans and addendums.

Service and Training

ProEst Takeoff is backed by a highly-trained staff of professionals with extensive construction and software knowledge. Our classroom, web-based, and on-site training options, accompanied with our ProEst Service Plan guarantees seamless integration into your current workflow.
