

DrawingBoard IV™

LARGE-FORMAT DIGITIZERS

Designed for demanding CAD, GIS, engineering, textile and apparel applications, the DrawingBoard IV series is the design professional's choice in large-format digitizers. DrawingBoard IV digitizers make perfect tools. They feature the industry's highest resolution, 12,700 lines per inch, a choice of corded or cordless transducers, as well as a variety of sizes to satisfy your application's requirements.

DrawingBoard IV digitizers utilize the same Advanced Function Technology that has set the world standard for performance. Internally, these high performance tools are engineered with a state-of-the-art positioning grid to ensure reliability, performance and quality. Multiple accuracy versions are available to match specific system requirements and an integrated mounting channel allows accessories, such as a pen tray, to be easily and quickly mounted.

DrawingBoard IV digitizers also work with a variety of programmable cursors and stylus pens. Each pointing device offers a number of programmable buttons. By assigning specific program functions to these buttons, you'll increase efficiency and improve production times. Programmable cursor and stylus

interfaces allow full functionality and easier operation of complex programs as there is no longer any need to search through layers of pull-down

menus to access specific functions—simply select the appropriate button that is always at your fingertips. DrawingBoard IV's pressure pens are designed for demanding applications requiring up to 256 levels of pressure sensitivity.

FEATURES

Industry's highest resolution and accuracy

- Resolution up to 12,700 lines per inch
- Accuracy up to ± 0.002 inches

Choice of pointing devices

- Cordless or corded 16-button cursor
- Cordless or corded 4-button cursor
- Cordless or corded click tip pen with two side buttons
- Cordless light touch pen
- Cordless pressure pen with two side buttons
- Illuminated 16-button cursor with high-accuracy digitizers

Convenience features

- Clearly defined active surface with perimeter menu
- Easy-to-install software

Software drivers

- Wide range of compatibility
- Programmable macros
- Tablet mapping
